

## RB Rotating Spray Ball

The reliability of a static spray ball with the benefit of a rotating system

### Features

Double ball bearings allow for steady 360° rotation and a variety of mounting orientations

Thick wall design for higher impact spray

Spray pattern options for complete coverage or targeted cleaning

Media-driven turbine for rotation

Reverts to a static spray ball if rotation fails, decreasing down-time for repairs

### Applications

Tanks from 3–15 ft. in diameter

Static spray ball replacement

Heavily soiled tank surfaces

Low pressure, high flow rate
