Introduction

The TOP-FLO® name represents the finest in sanitary process equipment. TOP-FLO® pumps have been designed to offer efficient transfer of product over a wide range of head and viscosity conditions. TOP-FLO® pumps are easy to install, clean, and operate.

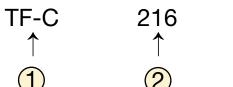

This catalog will answer many of the questions you may have regarding TOP-FLO® pumps. If you require additional information, a representative will be happy to assist you and can be reached at 1-800-458-6095.

TOP-FLO® pumps are suitable for use in CIP (clean-in-place) installations. This feature enables easy self-cleaning with no dismantling or take-down. Sanitizing of all product contact areas is automatic.

All TOP-FLO® pumps are available in standard inlet sizes and outlet sizes. In addition, enlarged inlet sizes are available for special applications.

Pump Ordering Information

Determining the model number of your pump is easy as 1-2-3-4.

PUMP SERIES
TF-C Close Coupled

PUMP MODEL

TF-C100, TF-C114, TF-C216, TF-C218, TF-C328

Note:

- TF-C Series furnished without legs unless otherwise specified on order.
- Casing Gaskets: BUNA (Standard). If other type is required, specify on order.
- Enlarged inlet: When ordering pump with enlarged inlet state inlet size, i.e., TF-C218MD with 3" inlet.

PORT CONNECTIONS

M - Clamp (Standard)

T - Acme Bevel Seat Thread

S - NPT Female Thread

F - Flanged

W - Weld

TYPE OF SEAL/STANDARD MATERIAL:

D - External balanced sanitary seal

DG - External balanced sanitary seal w/clamped insert

E - Water cooled balanced double seal

F - External balanced seal w/cascading water

Motor Data is not included as part of 4-step ordering number.

Provide the following information:

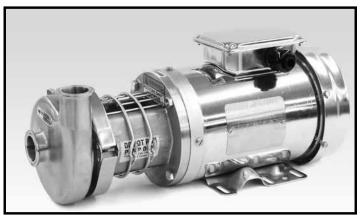

- Horsepower and RPM
- Electrical phase and voltage
- TEFC is standard

If motor is furnished from another source, supply the following:

- Horsepower
- RPM
- NEMA frame size

Remember to order needed accessories:

- Seal Kits and Parts
- Gaskets
- Clamps
- Hangers
- Air Relief Valves
- Check Valve
- Butterfly Valves
- Ball Valves
- Fittings

Model No.	TF-C100	TF-C114	TF-C216	TF-C218	TF-C328
Inlet	1-1/2	1-1/2 or 2	2 or 2-1/2	2 or 3	3 or 4
Outlet	1	1-1/2	1-1/2	1-1/2	2
Max. Imp.	3.68	4	6	8	8

PUMP SPECIFICATIONS

Pump Casings:

- Volute type Standard
- Inlet-oversizing as noted in chart above

Pump Connections:

SANITARY:

INDUSTRIAL:

Clamp

- Threaded
- Bevel Seat (ACME)
- Flanged

Pump Construction Materials:

- All wetted parts 316L SS
- Seals Carbon (other seals available)
- Casing Gasket BUNA (Standard)
- FKM, EPDM, and PTFE are available

Pump Finishes:

• Polished or Electropolished

Pump Seals:

• Available in D, DG, E, and F styles

Motor. Electrical:

- 3 Phase 230/460 volts 1750 & 3500 rpm
- Single Phase 115/230 volts 1750 & 3500 rpm

Motor Housings:

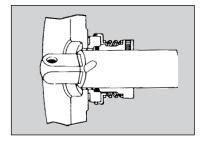

- TEFC (Totally Enclosed Fan Cooled)
- Washdown Duty
- Other styles available on request

For light duty transfer requirements, see Top Line brochure (TF-C100).

SEAL SPECIFICATIONS

TYPE D External Balanced Seal (Sanitary)

This versatile seal has numerous applications but yet is extremely durable. Dairy products, soft vegetables, beverages, and even acid cleaning solutions and detergents are among the recommended uses.

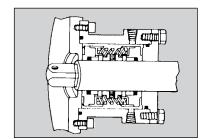

TYPE DG

External Balanced Seal with Clamped-in Seat (Sanitary)

The DG seal uses the standard Type D rotating seal components with a reversible silicon carbide, tungsten carbide or ceramic seat. Typical applications include liquid sugar, beverage syrup, chocolate and abrasive products.

TYPE E Water Cooled Balanced Double Seal (Sanitary)

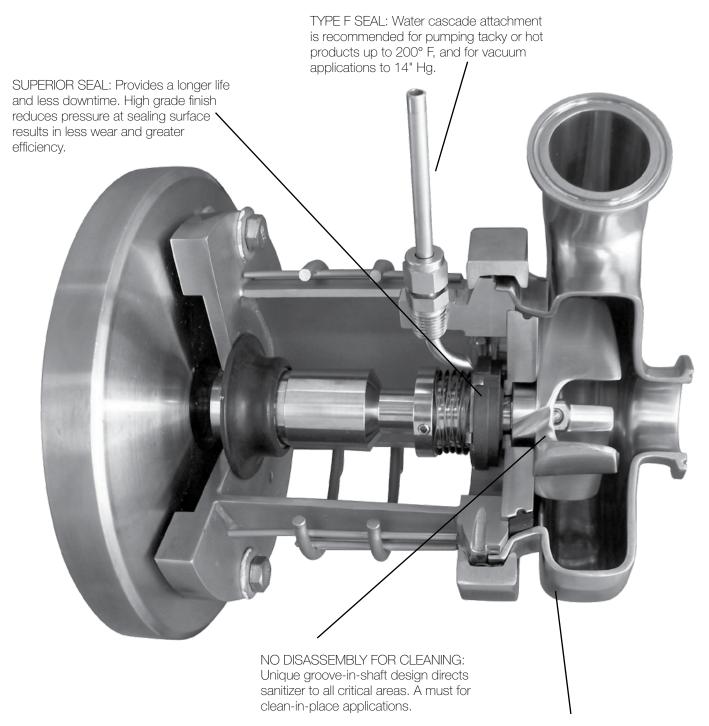

Type E is designed to withstand heavy duty vacuum applications (to 28" Hg), tacky products, slurries, or pumped products which may exceed 212°F. The seal chamber can be pressurized to permit use of drain piping for coolants and sealants. Coolant or sealant can be circulated through the seal chamber under very low pressure when used to cool the seal face or seal against vacuum.

TYPE F - (Sanitary)

Seal same as Type D seal except includes a water cascade (not shown).

All sanitary seals meet 3A accepted practices.

TOP-FLO® pumps are top performers using numerous features

CASING: Finely polished casing suitable to meet numerous requirements. Casing available in a wide selection of port connections to meet a variety of piping systems.

TOP-FLO® Pump Sizing Application Data

Use of a Pump Curve Chart

The curve chart is the best resource to use when selecting the proper impeller and motor for applications in the food, dairy, beverage, pharmaceutical and cosmetic industries. The curve chart enables the user to determine how a pump will perform at different impeller sizes and motor speeds.

Operating at 1750 RPM and 3500 RPM, curves have been listed for the TOP-FLO® TF-C100, TF-C114, TF-C216, TF-C218, and TF-C328 centrifugal pumps on the following pages. An instructional chart is listed below.

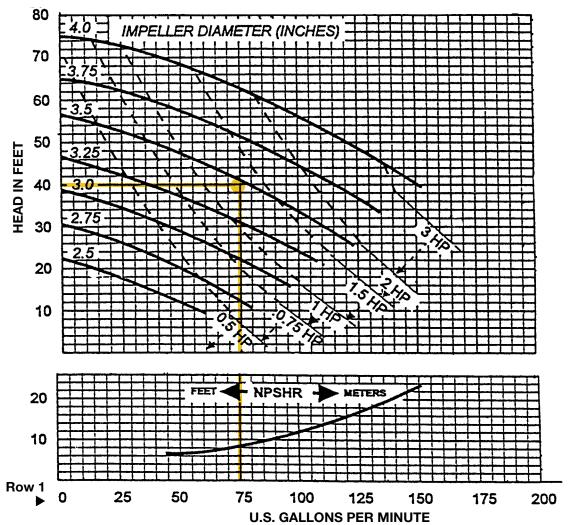

Note: Column #1 on the left shows head in feet
Row 1 at the bottom shows gallons per minute
Impeller sizes are listed on curve line
Motor horsepower listed on diagonal serrated lines
NPSH required is #3 and listed at the bottom of chart

STUB SHAFT SET SCREW TORQUE TABLE

DUMD OIZE	FDANAF	SET SCREW	HEV KEY OLZE	TO	RQUE
PUMP SIZE	FKAME	SIZE	HEX KEY SIZE	IN/LBS	FT/LBS
C100	56TC				
	56TC	5/16"	5/32"	144	12
C114	14TC	3/10	3/32	144	12
	18TC				
	56TC				
	14TC	3/8"		258	21.5
C216	18TC		3/16"		
	21TC				
	25TC				
	14TC				
	18TC				
C218/328	21TC	3/8"	3/16"	258	21.5
0210/320	25TC	3/0	3/10"	230	21.0
	28TC				
	32TC				

Example: On the curve listed below, find the impeller size and horsepower of motor for 75 GPM against total head pressure of 40'.

Column #1

Answer to example:

- 1. To determine duty point:
 First, find the 40' of head
 in column #1. Second,
 find the 75 gallon per
 minute in column #2.
 Then, trace the 40' of
 head mark to the right
 until it intersects the 75
 GPM line.
- To determine impeller diameter. The duty point falls between the 3.25 and 3.5 impeller curve lines. Always choose the curve line above the duty point. In this case it would be 3.5.
- 3. To determine NPSHR
 (Net Positive Suction
 Head Required): Use the
 NPSHR graph and plot the
 intersection point of
 75 GPM. Follow
 horizontally to the left. It
 reads 9'. (This will be Net
 Positive Suction Head
 Required.)
- 4. You will see at this point a 3.5 impeller and a 1-1/2 horsepower motor is required.
- Note: NPSHA (Net Positive Suction Available) must be > or = NPSHR (Net Positive Suction Head Required).

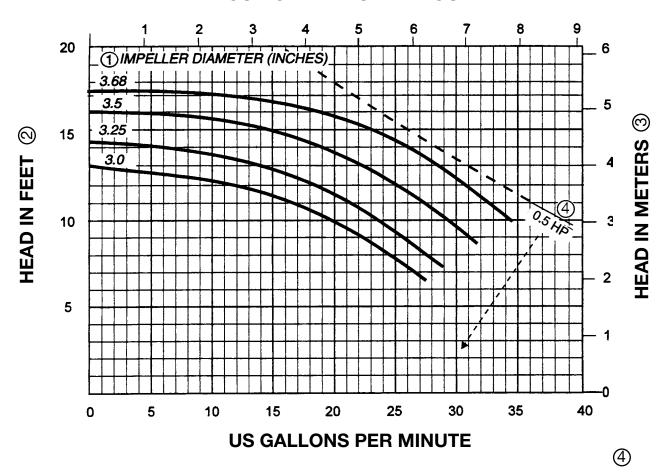

Capacity Curves Based on water at 70°F (22°C)

How Capacity Affects Friction

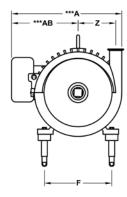

The following table was developed to indicate loss of head due to friction – in feet loss per fitting or in feet loss per foot of tubing – through stainless steel tubing and sanitary fittings.

Friction Loss in Sanitary OD Tubing and Fittings

Capacity			O.D. Tube	Size		
in	1	1-1/2	2	2-1/2	3	4
U.S. G.P.M.	I.D.=.870	I.D.=1.370	I.D.=1.870	I.D.=2.370	I.D.=2.870	I.D.=3.834
	Tubing Elbow Tee	Tubing Elbow Tee	Tubing Elbow Tee	Tubing Elbow Tee	Tubing Elbow Tee	Tubing Elbow Tee

TOP-FLO® Pump Replacement Kits

From time to time, centrifugal pump sealing components need to be replaced. TOP-FLO® centrifugal pump replacement part kits are specifically designed to fit in the pumps of not only TOP-FLO® pumps but those of major pump suppliers. These components are rugged and will provide the necessary sealing conditions under a wide range of conditions.

In addition to the pump replacement kits, Top Line offers a complete line of replacement parts. From impellers to leg brackets, Top Line should be your first choice for replacement parts.

TOP-FLO® Pump Dolly

The TOP-FLO® pump dolly has an emphasis on your convenience. Its mobility will allow you to find many functions in your manufacturing process.

Standard features are as follows:

• Universal dolly designed for any style pump with motor through 10HP

• Full 304 stainless steel construction with 2 fixed wheels

- Bead blast finish
- 8" semi-pneumatic wheels
- Adjustable pivot point axle
- Handle mounted cord wrap

Optional features are as follows:

- Finishes: Mechanical polish Electropolish
- Full range of control options:
 VFD
 Start/stop controls
 Network controls
- Wheels: Non-marking white wheels Full pneumatic Solid
- Special customer design requirements

Advantages:

- Designed for your convenience and any application
- Can be designed & manufactured to your specifications
- Convenient roll-away design
- Mobility allows you to find many functions in your manufacturing process
- Durable (full 304 stainless steel construction)

TOP-FLO® TL60ARV Air Relief Valve

The TL60ARV Air Relief Valve is used primarily when removal of air from a line without loss of product is a concern. The design of the TL60ARV is simple: a ferrule, a housing with a plastic ball, and a vent pipe all connected using 2 standard heavy duty clamps. This design will not let air enter the line or container under negative pressure.

The TL60ARV is double seated. The lightweight ball is freely moving and depending on pressure conditions will close against upper or lower seat. This valve is not designed for use in operation with liquids having less than 1.0 specific gravity.

The valve can be mounted on the top of a pipeline or container to bleed a pipeline where an air pocket may have formed during operation.

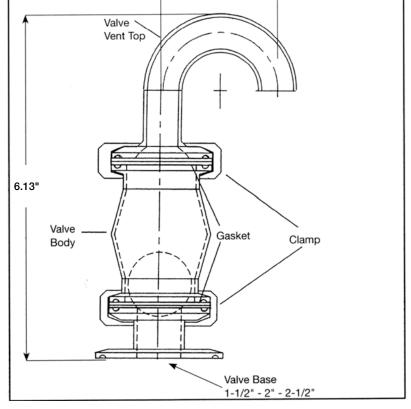

Bleeding a pipe on the suction side of a pump will be automatic. Air binding will be prevented. These valves are found mounted on the top of the inlet pipe in front of the pump.

Always giving you top of the line service and quality.

This is what our customers are saying about us:

What is the benchmark for this industry.

Service.

The stainless steel sanitary fittings/valves industry has morphed and changed over my 24 years of dealing with it... and many suppliers/distributors/manufacturers have come and gone... those who have survived and thrived, have done so because of that benchmark.

What says "service" to me... reliability, promptness and the ability to react to the marketplace and competition when it's needed. The 25 year relationship between Shambaugh & Top Line has perfectly defined and proved this is still possible in the volatile sales world we live in.

There has been a steady and consistent understanding between supplier and customer that has worked for those same amount of years.

All of Top Line's personnel have been commendable for the major bulk of those 25 years...

As to the point of specifics... Ann Marie has been the epitome of what I've defined above. For Shambaughs needs/requests... she has met and exceeded that benchmark... consistently.

Bob Goleeke, Shambaugh & Son

I have been working with Top Line for about 7 years. my company, for many years more.

Their personnel, service, pricing and product quality is excellent.

They have very helpful and knowledgeable engineers that always help us in more complicated scenarios. You can't ask for more from a supplier. They are responsible for my company winning many projects. I would recommend Top Line to anyone in the industry.

Bravo Top Line,

George Palov, Sales Manager - Haleson

Top Line is the leading supplier of sanitary stainless steel process equipment serving the food, beverage, dairy, pharmaceutical, biotechnological and personal care industries. For over 50 years we've provided our customers with exceptional customer service and quality products. We are committed to meeting the fastest delivery, new product development and application engineering to meet all our customer's needs with our extensive inventory and expert sales team.

Limited Warranty

Top Line Process Equipment Company products are warranted to be free of defects in material or workmanship for a period of one year from date of shipment. Warranty covers those Top Line products used in an approved installation and maintained in strict accordance with recognized standard industry practice. If, after properly authorized return, Top Line determines that products are defective, Top Line may at its option, repair or replace such defective products.

Top Line shall not be liable for consequential, indirect or incidental damages. The above warranty is in lieu of all other warranties, expressed or implied.
